## PROJECTS

---

OCSC APP - The external pages for the Orlando City Soccer App.

- Connected the MLS API using HTML, CSS, Javascript, and Handlebars letting users look up the roster, schedule, and standings for the soccer club.

PORCHSWING.FM - <https://www.youtube.com/watch?v=HDB1ivI4zNg> - A full stack (MEAN) music review/concert lookup web app.

- Connected four different API's (Spotify, Songkick, Echo Nest, and my own) to enable the user to look up concerts for their favorite artist, and review the albums. Has a built in spotify player to listen to the album before reviewing.

DEVVIT - <http://devvit.herokuapp.com/> - A full MEAN Stack social network for developers.

- Social networking capabilities, and a tool to find other developers to help with projects. Using passport.js for local authentication, and amazon S3 for hosting users image.
